New Blanket Folder

BFS-1-23

TOTOFOLDER 
東都フォルダー工業株式会社

Conveyor Direct Feeding Mechanism

Simply place items on conveyor. They are automatically transferred, spread and fed.

Buffer Function

Max. 3 pieces can be buffered.

Space-Saving achieved through integration

Total depth is minimized by eliminating transfer arms. Being lower than usual machines, BFS-1-23 is really Space-Saving.

Blanket Folder BFS-1-23

A large blanket folding machine, introducing the Blanket Folder BFS-1-23. A unique integrated folding system that is capable of handling large and thick items such as airline blankets, etc.

Low position stacker is equipped as standard and blankets are stacked there once folder.

Feed items to conveyor directly

Spread items and transfer

Convenient window to observe inside

observation accessibility into the machine. Also, a lint bag cleaning can be done easily.

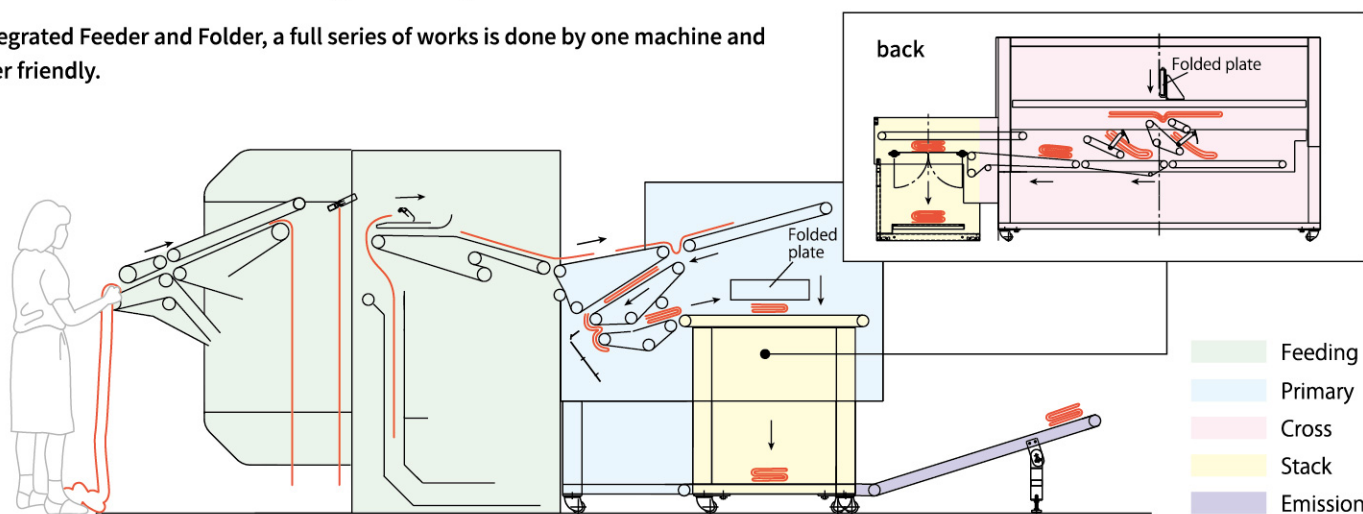

Dealing with thickness

Gaps at folding positions are designed to be slightly larger. At all the Cross Fold sections, folds are made by knives, which gives perfect foldings.

Just one machine from feeding to folding

Integrated Feeder and Folder, a full series of works is done by one machine and user friendly.

Typical folds *Depending upon sizes of items, the numbers of folding vary.

(Target items: All dry works such as blankets. Length 1,000 – 2,000mm × Width 1,000 – 2,300mm)

	Primary		Cross		
Example	1st Primary	2nd Primary	1st Cross	2nd Cross	3rd Cross

High Power & Speedy Finishing

T-ROLL Series

Gas Heated Ironer

T-ROLL GAS 1335-2G

Steam Heated Ironer

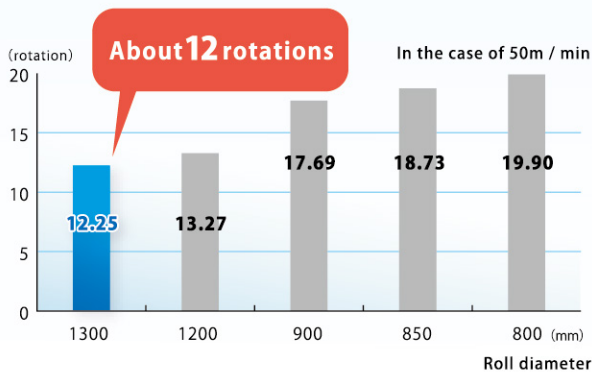

T-ROLL 1335-3S

Compact and High Power

In spite of the roll with such a large diameter of 1300mm and such wide width of 3500mm, the installation dimensions are extremely compact. A high speed of 55 m / min can be achieved even at a low rotation of 12 rotations thanks to such a large diameter roll.

High quality

The rigid chest is specially designed to open firmly at and over 0.8MPa, and the roll, item and chest will fit well, which gives the high finishing quality to linens.
