Random feeding for 1/4 fold items

Unique folding mechanism
By 1 fold plate, twice folding are made in one time.

Even bath towel and face towel are fed randomly, suitable folding is made automatically in accordance with towel size. Besides, stacking is made individually.

1/2 fold for bath mat

Applicable to 1/4 fold for thick article

1/4 Folder for Face/Bath towel

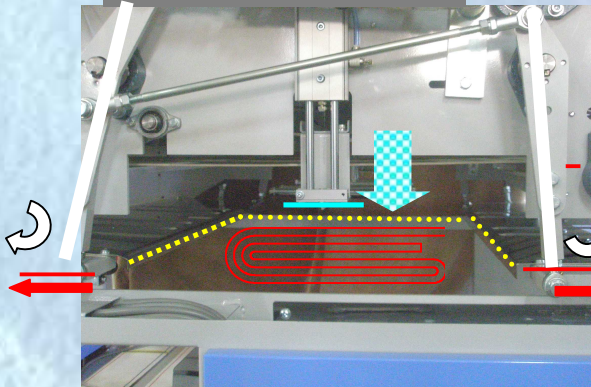

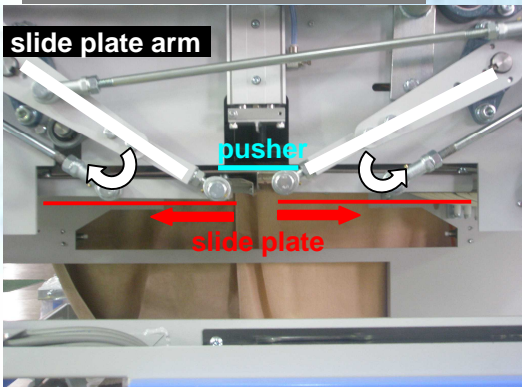

T1A-S

Towel Folder

Improved stacking quality by slide plate & pusher system

Before receiving towel

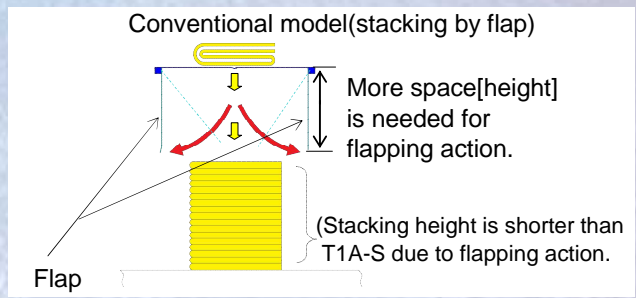

When stacking towel

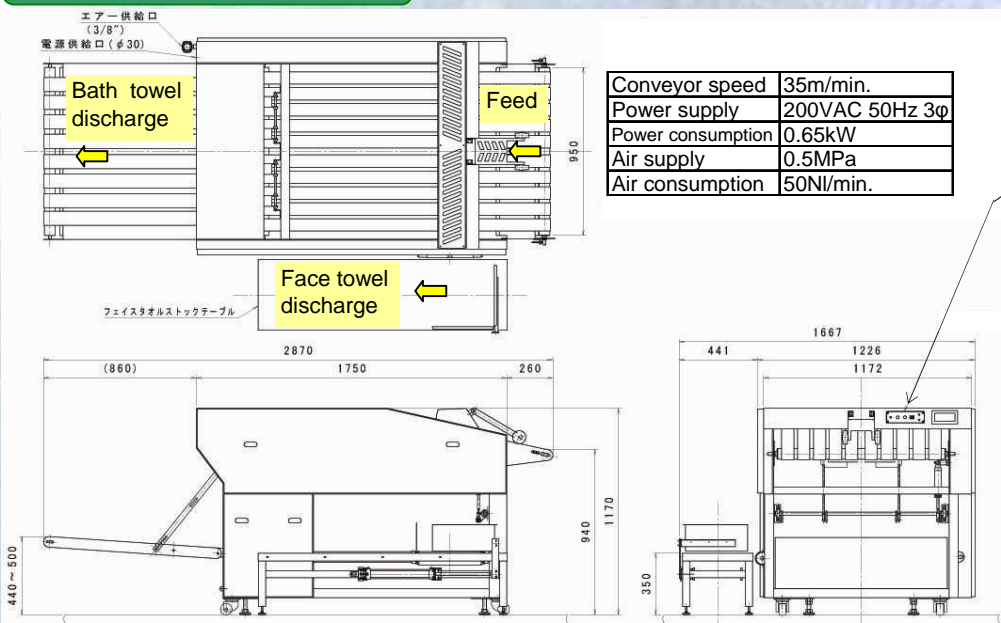

Space[height] for stacking action is small.
(Space[height] for stacked towel is secured.)

Cross section view of stacking part

Instead of stacking by flap, slide stacking system is equipped newly.
It ensures more sufficient stacking height(thickness) than conventional model.
And by adapting pusher for stacking, deformation of towel during falling down can be minimized.

Outline drawing

New touch panel

- (English version is available, too.)
- 4 inch colored touch panel
- 5 programmes(modes) can be memorized.
- Production quantity per mode, bath towel or face towel of bath mat, etc. is indicated.

For better performances, specifications are subject to change without prior notice.
